

Harrison Global Transportation Now Driving Green

WALTHAM, Mass. – March 15, 2010- Harrison Global Transportation (HGT), a premier transportation provider announced today it was adding Hybrid sedans to its chauffeured fleet.

The decision to add the Ford Fusion Hybrid was based not only on requests from its corporate clients, but also on the company's own "green" initiatives. Meeting our corporate clients' needs is absolutely our number one priority" said David Marcou, Jr., president and CEO of Harrison Global Transportation. "However, adding a hybrid solution is a decision that provides flexibility to our clients and one that will have the greatest environmental impact."

Harrison Global Transportation will incorporate 10, 2010 Ford Fusion Hybrid Sedans as part of the company's chauffeured services and will additionally include all passenger amenities for this service level. Harrison Global chose the Ford Fusions based on ratings and reviews. The Fusion Hybrid boasts the highest EPA rated fuel economy car in addition to offering style and comfort. Most importantly, idle or wait time is in battery mode. The new hybrids will join the company's fleet of Lincoln Executive L sedans, SUVs, limousines and vans, giving customers an additional choice when making their corporate or personal travel plans.

Customers will receive the same level of service and amenities they've become used to but will now leave a green footprint. Marcou adds, "we are excited to offer this new level of service to our customers and hope the environmentally friendly choice is a positive, long term success".
